WORKING ETHOS

At Al Hadeed Technical Concern (SMC-Private) Limited, We are prepared to be different and have always operated as a Team - valuing the contribution of our staff, specialist subcontractors and material suppliers. Our team approach has enabled us to deliver value added service to our clients, achieve very tight program restraints, and ensure that work is enjoyable for the whole project team.

By listening to our clients, and understanding their requirements, we provide a service that is proactive and innovative. We are known as *industry innovators* - embracing new ideas and developing these to meet our client's needs.

Our application of new ideas makes us stand out as one of the leading contractors. We have completed a number of prestigious projects and the quality of such projects speaks for itself.

We are conscious that our organization is relatively new, however as an organization we are firmly committed to partnership type arrangements with our clients and each task is undertaken with a view to establishing and maintaining an effective long term relationship. These basic values form a firm foundation for our expansion. We have embraced the new working ethos in construction and are at the forefront of developments in partnering, supply chain management, and value engineering.

Being a smaller company we believe in offering a more personalized approach to contracting which in turn offer's a rapid response, quality service to the customer, at a reasonable cost. We recognize the need for minimum disruption to existing operations. Clients are increasingly turning to us as we can offer a very different type of service - supporting their future business needs. We are innovative and proactive offering a complete asset management service.

- ⇒ Achieves all contractual requirements.
- ⇒ Meets every aspect of the Client's needs.
- ⇒ Is appropriate to purpose of the Company.
- ⇒ Meets and exceeds all current safety legislation.
- ⇒ Adheres to construction schedules and budgets.
- ⇒ Is communicated and understood within the Company.
- ⇒ Provides a framework for establishing and reviewing quality and environmental objectives.
- ⇒ Continually improves the effectiveness of Quality and Environmental Management Systems.

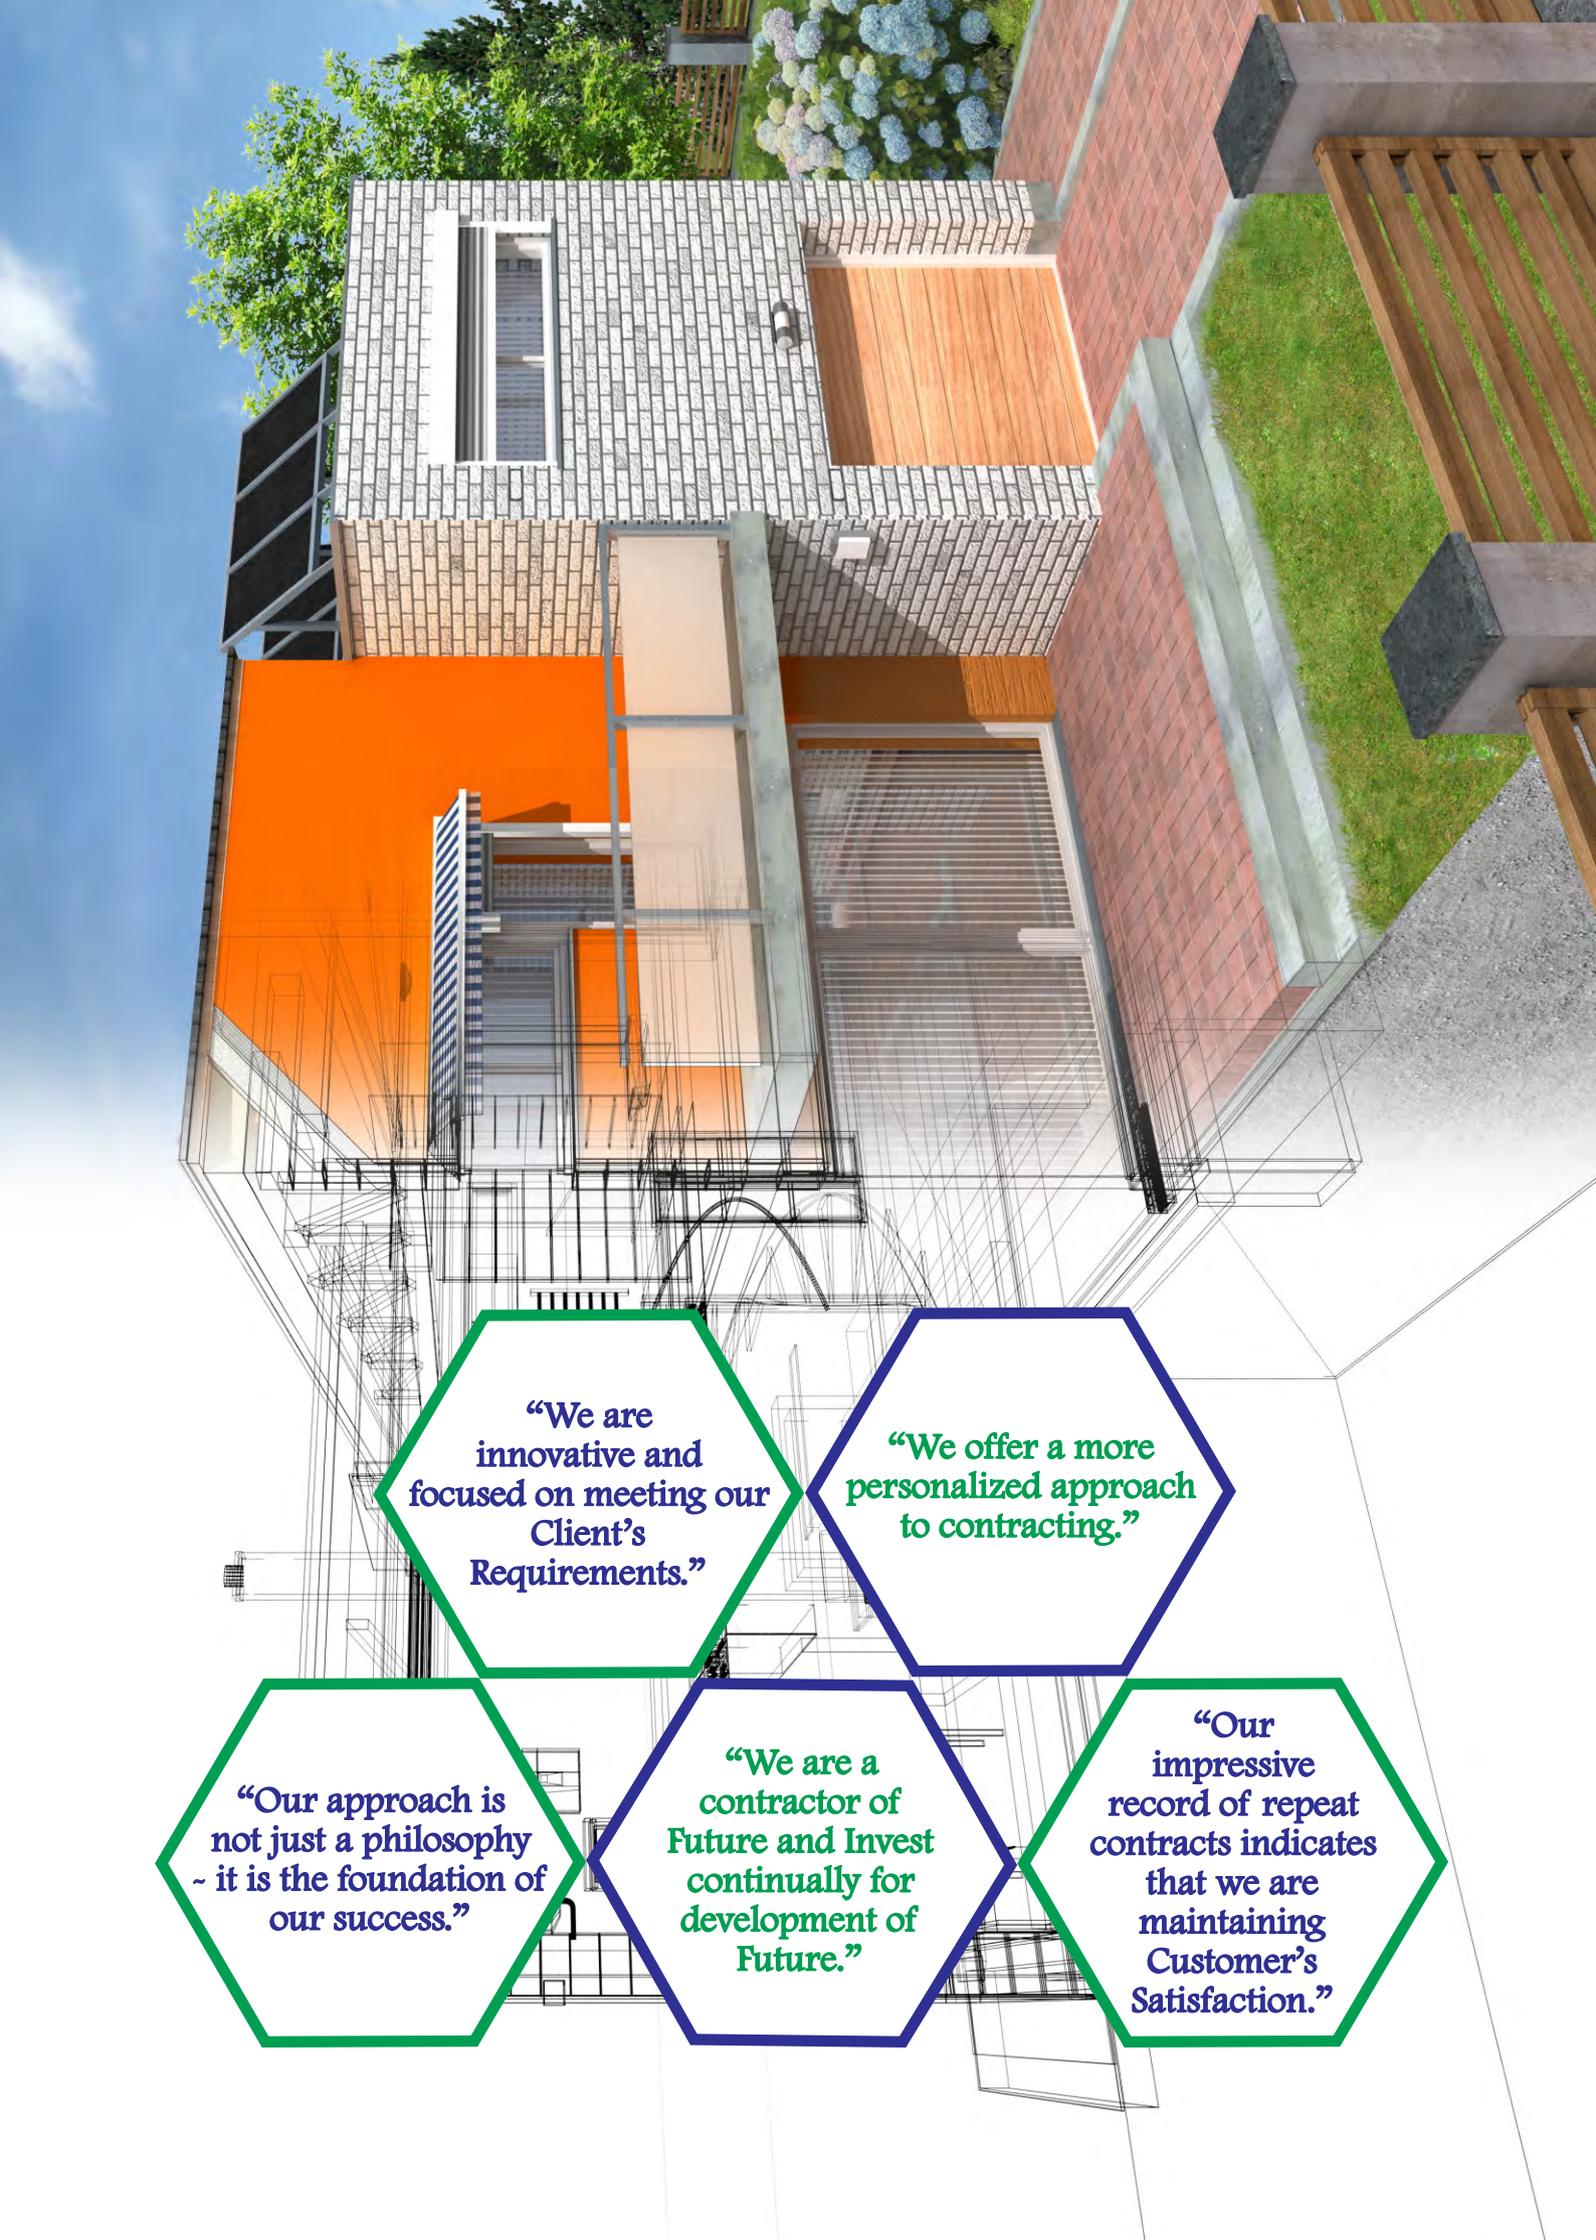

At Al Hadeed Technical Concern (SMC-Private) Limited, we value the skills and resources of everyone in the supply chain. We work as integrated teams to ensure that the projects delivered to our clients are of highest standards. The development of a close working relationship with the whole supply chain has enabled us to identify savings and innovations, improve overall quality, reduce program times, and reduce time wasted on administration.

The procurement of materials is a major part our budget. We are constantly looking for new suppliers who can meet our high specifications and are bringing new products on to the market for Fire Fighting & Fire Alarm System, Weather Control Equipment, Alternate Source of Electricity/Energy, Electrical Protection System and Air Conditioning Machines for A/C System. We have arrangements with plant and equipment suppliers to supply/supplement the significant fleet of Tools, Plants, Materials and stocks of equipment. Continued expansion is a result of **quality** projects being delivered **safely**, on **time** and at **increased value** to the client.
